

Latent means analyses effect sizes for the three-factor abbreviated MSAI (Anger Experience, Hostility, Destructive Expression) model

Variable	Australia	Guatemala	Peru	Japan	USA
<i>Country latent means analyses with the USA sample set to zero</i>					
Anger Experience	.73*	.50*	.37*	.53	.00
Hostility	.40*	-.12	-.08	.21*	.00
Destructive Expression	.30*	-.06	-.04	-.17	.00
<i>Gender latent means analyses, females compared to males within country</i>					
Anger Experience	-.12	-.08	.03	.09	-.32*
Hostility	-.12	.03	-.20	-.35*	-.45*
Destructive Expression	-.67*	-.31*	-.19	-.42*	-.66*

Note. * $p < .05$.
